

Essential infrastructure to support teams and individuals working across film, tv and advertising. Connect with 500+ M&E companies and 1000s storytellers on the world's largest private fibre network for film, TV and advertising. You never have to choose between security and transfer speed again.

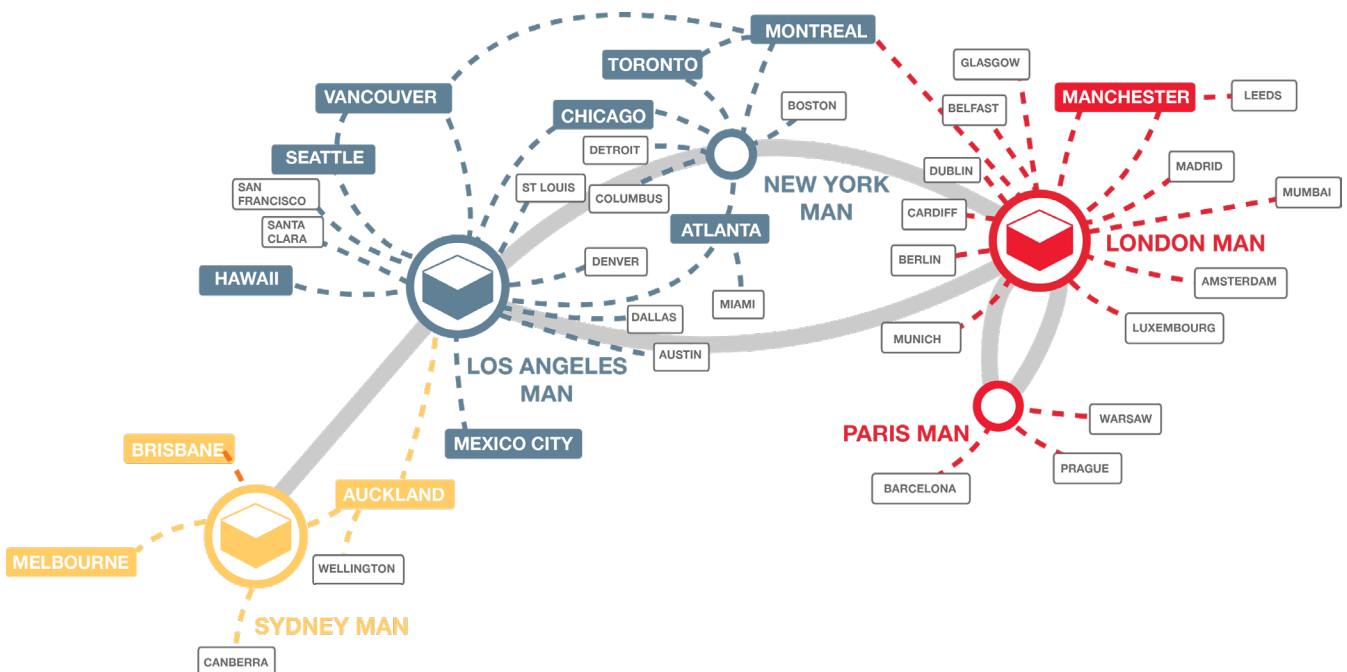

As a dynamic, expandible network, SMN can be configured to meet your particular requirements. Using a future-proof fiber network, customers are able to avoid the insecurities of the Internet and transfer files, no matter how heavy they are, quickly, securely, and predictably.

RELIABLE

The SMN gives you a dedicated, uncontended connection to distributed teams and partners. We install a fibre connection at your location that gives you instant access to all the industry's key players. Guaranteed bandwidth speeds of up to 40Gbits/sec allow you to transfer and share content painlessly, so you can predictably deliver on deadlines.

SCALABLE

We know no-one wants to invest in bandwidth that's only used now and again. Our scalable network and flexible contract terms mean you can boost bandwidth when needed to meet peak project demands or tight deadlines. With seamless, uncontended file transfers, your teams can connect fast and work smoothly – even when data needs are spiking.

HOW IT WORKS

We will install a connection directly into your building, giving you uncontended access to our network. We give you the physical technology to connect to our network at 100Mbit/s, 1Gbit/s or even 10Gbit/s; but more importantly, we give you the backup and expertise to ensure that you can achieve these transfer rates when using the network.

To help with this we offer a range of complementary services covering networking, hosting, delivery, Internet, security and consultancy.

We are continually adding POPs and redundant paths to ensure that as your reach goes global, the SMN is there for you and your collaborators.

FEATURES

Streamlined access to your teams and partners

Our private network provides direct access to 500+ major media companies worldwide.

Speeds and performance guaranteed

Guaranteed connectivity speeds from 100Mbit/s to 10Gbit/s to Local MAN, fast response times and zero external contention.

Studio-grade network security

The secure infrastructure provides a safe route to transfer valuable content with confidence.

Reliable connectivity

With an uptime rate in excess of 99.999%, we provide a network you can depend on.

Flexible and scalable

Scale your offering with “bursts” to higher bandwidths to accommodate project needs.

Expert support

Our experts are on hand 24/7 to help solve wider media workflow problems.

Complimentary “Freeway” service

500 Mbps Domestic and 200 Mbps International

WHO'S ON THE SMN

“We use Sohonet because they’re approachable and extremely knowledgeable about the post-production industry and its often unique requirements. They’re also great at helping out with more unusual one-off requests extremely quickly.”

Jonathan Brazier, Group Computer Systems Manager, The Mill
