

REMOTE EDITING

Save time and preserve creative intent

There's a real dynamic to the creative relationships forged in the editing suite. So, it's no surprise that directors often go back to the same editor, movie after movie. They understand each other, can read between the lines, and have a wealth of shared experience in delivering a unified creative vision. But what happens in the new world of remote work?

Offline reviews simply don't offer the same experience as being in the edit suite together. Successful remote review and approval discussions require a real-time solution to recreate that over-the-shoulder collaborative

experience from wherever you are. As the entire workflow from edit sequencing to final reviews by the director is critical, we have developed to the solutions to facilitate an "in-suite" editing experience.

SOHONET HELPS EDITORS WITH REMOTE COLLABORATION

Sohonet's Emmy Award-winning review tool, ClearView Flex, lets editors perform real-time reviews with collaborators and clients remotely. They simply click a link to be taken to their stream, and can easily switch between sharing the output of their edit session via SDI, (for frame and colour accurate output), and sharing their desktop via HDMI.

SHARE SOFTWARE, TIMELINES, LIBRARIES AND SOURCES FOR A COLLABORATIVE EDITING EXPERIENCE

The Flex range currently supports content up to 2K DCI and 1080p resolution, with up to 10-bit colour depth and 4:4:4 chroma capture for broadcast-quality video streaming. Editors can share their edit software, complete with timeline, bins/media libraries and source viewer for a collaborative editing experience. And because Flex is designed to work with ultra-low latency even with low bandwidth availability, you get rock-solid performance and playback and the pace of the cut seen by others isn't lost.

REMOTE EDITING IN ACTION

HIREWORKS, one of Europe's leading rental companies, provides location postproduction and cutting rooms in central London to such clients and productions as **Game of Thrones**, **Bohemian Rhapsody**, **Fantastic Beasts**, and **Wimbledon tennis**. A large part of Hireworks' business is hosting the post-production of films and TV dramas in its editing suites and cutting rooms, but clients are increasingly wanting or needing to work remotely.

Deploying ClearView Flex enables Hireworks to offer the remote-

working tool as an 'added extra' for its clients. Having ClearView Flex ready to go in-house means Hireworks can now arm its clients with a trusted and secure tool to help solve their remote collaboration challenges. And by coordinating directly with Sohonet's 24/7 support team on setup and to resolve any issues, Hireworks provides a much smoother experience for its customers.

MEET THE CLEARVIEW FAMILY

Solving your real-time remote editing challenges

Sohonet's ClearView range gives you the freedom to meet the diverse collaboration challenges at every stage of your productions. Whether you're making decisions where quality is paramount, or you need the flexibility to review content from any device, anywhere, ClearView has you covered.

CLEARVIEW PIVOT: MULTI-POINT REAL-TIME REMOTE REVIEW

For remote content review sessions that just work, choose ClearView Pivot. It's a real-time, high-quality remote collaboration tool with added flexibility to pivot endpoints at the click of a button.

- > **4K HDR** with 12-bit colour depth and 4:4:4 chroma sampling
- > **5.1 surround sound** and 512kbps bit-rate
- > **Real-time streaming** with ultra-low latency
- > Delivered over the uncontended **Sohonet Media Network**
- > Connect **multiple endpoints** using a simple web interface

CLEARVIEW FLEX: REAL-TIME REMOTE REVIEW ANYWHERE

For truly flexible remote review, ClearView Flex enables real-time creative collaboration on editing, VFX and content production. Enjoy the best quality viewing experience from any location, on any device.

- > **Stream** via any network connection
- > **Access** on phone, tablet, Mac/PC or Apple TV
- > **10-bit colour** depth (4:2:2)
- > **5.1 surround sound**
- > **End-to-end encryption** and studio-grade security
- > **Work quickly** and effectively with that 'over-the-shoulder' review experience

CLEARVIEW GLOW: REAL-TIME REMOTE REVIEW IN HDR

ClearView Flex has expanded with Glow – offering new HDR streaming capabilities in real-time with ultra-low latency.

- > **Rendering the Rec. 2020 or P3 colour spaces** giving you much wider colour gamut to work with
- > **HDR/SDR content** of up to 2k DCI & 1080 resolution
- > **10-bit 4:2:2/4:4:4** colour capture and increased bit rates
- > **Multi-device support** delivering HDR to iPad, iPhone, Apple TV (coming soon)
- > **Built-in security** including encrypted video streaming, session burn-ins, and secure invite links
