REMOTE POST-PRODUCTION

Managing editing, VFX, colour, and sound review to build a cohesive story

Once production wraps, it can be a logistical nightmare getting key individuals to review and approve content. The DP may be on to the next project, the director and producers might still be engaged with myriad aspects of post-production at facilities around the globe, and studio execs are likely to be at their desks on the lot. Getting the right people in the same room – even if it's a virtual one — is far from easy.

EMPOWERING POST-PRODUCTION SUPERVISORS TO MANAGE REMOTE COLLABORATION

Taking advantage of ClearView Pivot's one-to-many real-time streaming architecture, post-production supervisors can work with all the different workflow teams – such as editorial, audio, colour, and DI/finishing – to establish a multi-screening room approach.

This lets the supervisor hold live sessions in which multiple teams of creatives can all watch the content together from separate screening rooms across campus, around town or even in different cities.

BRINGING EVERYONE TOGETHER FRAME BY FRAME

Creatives can play and pause the content at will, with every screening room seeing exactly the same frame at the same time. Our solution, Pivot, collaboratively brings all remote and on-site creatives together as they would be in a screening room, allowing everyone to see frame-by-frame and colour-accurate playback in real time, from whatever setup they have.

REMOTE POST-PRODUCTION IN ACTION

Statement Advertising is an L.A.-based production house, crafting high-profile 360 campaigns for leading creatives and studios. To overcome the challenges of a disparate team contributing at different points during post, they've chosen ClearView Flex to provide fixed video line for real-time connectivity. It ticks all the boxes for security, streamlined access and cost efficiency for review and approval sessions with Warner Bros, Netflix and Universal Pictures.

"ClearView Flex gives us the ability to do live reviews with our clients and meet their needs for quick collaboration and secure delivery. These demands are the new norm."

Corey Walton, VP Post-Production – Statement Advertising

MEET THE CLEARVIEW FAMILY

Solving your real-time remote review challenges in post-production

Sohonet's ClearView range gives you the freedom to meet the diverse collaboration challenges at every stage of your productions. Whether you're making decisions where quality is paramount, or you need the flexibility to review content from any device, anywhere, ClearView has you covered.

CLEARVIEW PIVOT:
MULTI-POINT REAL-TIME REMOTE REVIEW

For remote content review sessions that just work, choose ClearView Pivot. It's a real-time, high-quality remote collaboration tool with added flexibility to pivot endpoints at the click of a button.

- **4K HDR** with 12-bit colour depth and 4:4:4 chroma sampling
- **5.1 surround sound** and 512kbps bit-rate
- **Real-time streaming** with ultra-low latency
- Delivered over the uncontended **Sohonet Media Network**
- Connect **multiple endpoints** using a simple web interface

CLEARVIEW FLEX:
REAL-TIME REMOTE REVIEW ANYWHERE

For truly flexible remote review, ClearView Flex enables real-time creative collaboration on editing, VFX and content production. Enjoy the best quality viewing experience from any location, on any device.

- **Stream** via any network connection
- **Access** on phone, tablet, Mac/PC or Apple TV
- **10-bit colour** depth (4:2:2)
- **5.1 surround sound**
- **End-to-end encryption** and studio-grade security
- **Work quickly** and effectively with that 'over-the-shoulder' review experience

CLEARVIEW GLOW:
REAL-TIME REMOTE REVIEW IN HDR

ClearView Flex has expanded with Glow – offering new HDR streaming capabilities in real-time with ultra-low latency.

- **Rendering the Rec. 2020 or P3 colour spaces** giving you much wider colour gamut to work with
- **HDR/SDR content** of up to 2k DCI & 1080 resolution
- **10-bit 4:2:2/4:4:4** colour capture and increased bit rates
- **Multi-device support** delivering HDR to iPad, iPhone, Apple TV (coming soon)
- **Built-in security** including encrypted video streaming, session burn-ins, and secure invite links
