

ClearView Flex enables an 'over-the-shoulder' shared viewing experience. Stream live, encrypted video in real-time from any source to your team members or clients enabling them to review content remotely on their iPad, iPhone or Apple TV (coming soon). ClearView Flex has expanded with new HDR streaming capabilities in real-time with low latency, introducing ClearView Flex Glow. The Emmy Award winning ClearView Flex is part of Sohonet's ClearView product family - our real-time, remote collaboration toolkit for M&E teams.

## HDR Features

### High-quality streaming

Flex supports HDR/SDR content of up to 2k DCI & 1080 resolution with 10-bit 4:2:2 / 4:4:4 colour capture & increased bit rates.

### Ultra-low latency

Collaborate at the speed of light plus 2-5 frames of delay.

### Surround Sound

With 5.1 support for Apple TV, viewers can review full surround sound audio.

### Bandwidth required

Currently the maximum bit rate (super high) averages 15 Mbps.

### Multi-device support - high usability

User-friendly and easy to deliver HDR to iPad, iPhone, Apple TV.

### Remote Collaboration

Maximum of 40 viewers.

### Studio-grade security

Flex has built-in security including encrypted video streaming, session burn-ins, and secure invite links.

### Colour Rendering

Rendering the Rec. 2020 or P3 colour space gives you a much wider colour gamut to work with.

### Dynamic Range

SDR supported on all devices. HDR support on iPad / iPhone and Apple TV.

## SIMPLE TO USE

- 1: We'll send you a Flexbox
- 2: Connect creative workstation/ camera via SDI or HDMI to the Flexbox
- 3: Log in to the Clearview Flex webpage and name your session
- 4: Invite viewers by email to join a session
- 5: Viewers click secure link to view live encrypted session via any device: iPad, iPhone and via Apple TV
- 6: Team/clients collaborate in real-time, securely.
